# Step to Step Guide on Getting started on PTC business

This guide shows the necessary Steps to start with PTC business.

Before even to start, remember that PTC is a risky business, most of the PTC sites are scam sites, based on unsustainable Ponzi Scheme or similar.

Basically you have a Ponzi Scheme when a PTC (or another sites) pays his members only with the money paid by other investors rather than from profit originating from real investments and real business (see [http://en.wikipedia.org/wiki/Ponzi\\_scheme](http://en.wikipedia.org/wiki/Ponzi_scheme)).

So approach PTC business with extreme caution, read specialized Forums before to decide what PTC join , and then join for free.

After joined for free, before doing any upgrade or purchasing anything take a look at the PTC forum and try to taste the PTC pulse and the members mood; this is a good indicator of the PTC's health status (obviously don't even consider a PTC without a working Forum), look at payment proofs and stay away from sites that offer an excessively high click rate, clearly unsustainable.

Remember, this is not a traditional investment, it's a risky business, so **don' invest in PTCs money that you are not prepared or that you can't afford to loose.**

Those are the step you have to follow to start your PTC business:

## 1. Get an email account

First of all you need an email account.

My advice is to create a new account for your business, don't use your personal account.

If you are going to use Safelists, you absolutely need a second account, one for the SafeList, on for the Contact List (we'll discuss this on the SafeList guide).

I strongly suggest to get an email account from <http://www.gmail.com>; some sites (Safelists, PTC, HYIP) have often problems with other mail providers.

## 2. Get one or more Payment Processor Account

To pay for your purchase or to be paid for your earnings you have to get an Account on the so-called Payment Processors.

The most used in PTC business are:

<http://www.alertpay.com>

<http://www.paypal.com>

Other (used even on HYIP, and other investments Program) are:

<http://www.libertyreserve.com>

<http://www.moneybookers.com>

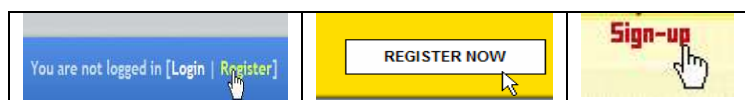

<http://e-gold.com>

My advice is to start with Personal accounts on AlertPay and PayPal. Personal accounts have some limits, but If you upgrade there are much higher fees, so until you don't really need, use Personal account.

## 3. Join a PTC Site

Now you have the necessary tools, so you can join your first PTC site (remember the advice on the introduction).

Go to the homepage of the Site, click the register (or Signup) button (here are some samples):

Fill the form with the required information, check the box to accept the TOS, put in the security code and click Register. This is a sample registration form:

## Register

\* Username (3 - 15 characters - no special characters):  
webuser14

\* Password (at least 6 characters) - FOR SECURITY REASONS, DO NOT USE THE SAME PASSWORD AS ANOTHER SITE:

**Very Important: don't use the same password on different sites, and don't use password too weak, otherwise your account could be hacked and you can lost money.**

## 4. Login

After signin-up (and in some cases after the account activation using the provided activation link), you can login using your userid/password:  
Click on Login:

Put in your username, password and security code

### Login

## 5. Start Clicking ads

Now you are logged in. You can go to you backoffice (usually My Stats button) and see your statistics (referrals, numer of visit, pending payments, amount paid and so on), modify your profile (**Important: be sure that you write correctly your AlertPay / PayPal email before cashout**), upgrade membership and, obviously, surfing Ads (that is supposed to be the main purpose of PTCs, remember ? )

So, click the Surf Ads button

As you can see in this sample, some links are not active, because I have already visited them. Some others can be clicked, so I click the link and a new windows opens with the ad.

Obviously you can open multiple browser windows and repeat those steps for different sites at the same time, but one only ad for one site at the same time.  
Don't open multiple accounts on the same ip, or you'll be banned.

I hope this can help you.
