Step to Step Guide on Using Traffic-Exchange Sites

Part 1

The Traffic Exchange sites have the function to bring traffic to your web site, thus helping to solve one of the key problem for online marketers: the lack of visibility.

You have a web site you want others to see, while others have a web site they want you to see.

Traffic Exchange sites meets those two needs; Other members visit your web site, you see their web site. The result is more free quality traffic to your web site.

Those are the step you have to follow to start with Traffic Exchange sites (i used Easyhits4u.com as a sample):
